## Medical and Dental Ministry

October 2016

Dear Friends,

When Bobae was 8 years old, her parents became missionaries to Indonesia. The transition was hard. She left friends in her native South Korea and endured bullying at her new school. But God had a plan for her.

During a mission trip organized by her parents, she was enthralled by medical missionaries she saw in action. Such became her dream and calling. After studying hard in school, God opened the door for her to attend college in the United States and then gain admission to medical school in California. And that's where we met her.

**Bobae plays with Dominican children outside our Mission Clinic**

Bobae attended our weekly Bible studies and Spiritual Care Practicum. She realized talking with ill patients about their spiritual needs required a yet to be acquired skill set. Still she persisted in learning and soon found herself in Dominican Republic on our Spring Break Medical Missions trip. There she met Ana DePuy, RN, one of our ministry Board members. Bobae noticed that Ana was a natural at meeting the physical and spiritual needs of the patients. Ana told Bobae, "For me, it all started at the Preceptorship." Bobae decided to join us for the 2016 Preceptorship.

Bobae now finds she is more comfortable and confident in her conversations with patients. Last Friday at the weekly spiritual care practicum, God used her persistence in being trained to care for the whole person. A male cancer patient asked her, "Are you sure that you will go to heaven?" She immediately said yes, and with the patient's permission, explained that because of what Jesus did on the cross for us, he could know for sure as well. Within a few minutes of his positive response to Bobae's sharing the Gospel with him bedside, this man now knows that he too will one day be in heaven with Jesus.

**Diana with Bobae & medical students**

Thank you for making a difference in Bobae's life and for equipping her for a lifetime of medical missions.
