

A Partner Ministry of Cru

August 2014

Dear Friends,

Have you recently been to some of the less economically fortunate neighborhoods of Memphis, Tennessee? Even if you have not, you are making a difference in the lives of Memphis teenage gang members, single mother households, and those who are in between jobs.

How are you making a difference? Meet Chris Peoples, MD, a senior family medicine resident.

Many may remember Chris from our past newsletters. We met him during his first year of medical school in California. He arrived eager to live out his faith through medicine, yet he was not exactly sure how. Your prayers and investments changed that.

The enclosed magazine is our gift to you. It features a [cover story](#) about Dr. Peoples serving the less fortunate of Memphis. Interestingly enough, Cru featured an online version of this story in the Spring. It generated more Facebook “likes” than any previous story in Cru’s history. It was widely circulated and was even featured on secular medical websites. Seems people are appreciative and excited about a physician who cares for both the physical and the spiritual.

God is using Chris...plus, He is using you to change lives. And while we do not aspire to make each disciple “a singing doctor”, we are asking Him to use you and us to build more healthcare professionals who point patients to Jesus who heals completely.

Thanks so very much for reaching out to people like Chris and his countless patients. Enjoy the story. You helped make it come true.

Until the whole world hears,

Bob and Diana Mason
