## Medical and Dental Ministry

July 2015

When students land at our summer Whole Person Care Preceptorship each June, they laugh at the Preceptorship slogan “*A Summer That Lasts a Lifetime*”. They think it’s “hokey” or “old fashion.” But as they encounter Bible study, professional training, and patient interaction, their laughter stops. They discover that the Preceptorship is not just about the 4 weeks they are with us, but about the next 40-50 years of their lives. They get that the things they are doing this summer are things they can keep doing in their training and future jobs. **You see, our Preceptorship is more about their lifetime of living on mission worldwide than it is about their summer of 2015 in California.**

Denny is one man who joined the 2015 Preceptorship. After completing his physician assistant (PA) degree last year in May 2014, he started a one year internship with Cru in Detroit. He finished that Cru internship with us at the Preceptorship. In California he experienced the same training as the other students *and* served in a leadership role as well.

At the end of the Preceptorship, Denny returned to Detroit and immediately began working as a PA. On his first day of professional work, he wore his Preceptorship t-shirt under his scrubs to remind himself of his commitment to care for both the physical and spiritual needs of his patients. Please pray God works through Denny.

Next month, you’ll hear directly from the Preceptorship students about their time in Redlands.

Thanks for building into the lives of these students. And thank you for the difference you’ll make in the lives of their patients. Each and every day, you are impacting so many.
