

April 2022

## Resumption Anew!

**We're back!** That's right. After 24 months of life in the virtual reality of ZoomLand, God has opened doors to resume our weekly *in-person* Spiritual Care Practicum at the medical center.

And that's not back at the same hospital we left in 2020, but a *NEW* medical center.

Ministry file photo

On Friday afternoons we again gather interested students and provide practical and professional training on whole person care. Then, we pair students together along with more experienced and trained student coaches to visit real patients bedside at the hospital.

Feedback from the patients is consistently and overwhelmingly positive. Students develop professional Christian spiritual care skills that will serve them and their future patients for a lifetime. And med student coaches say the patient and peer-to-peer student interaction is a "lifegiving" change from the endless rigors of studying.

**Thanks for so faithfully standing with us** during these times of challenge, disruption and increasing resumption!
